**Url :-** [chatbot link](#) <- click

**Image-**

## 5 .Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page

The screenshot displays the IBM Watson Assistant interface for a service named "Dress". The interface is divided into two main panels: a left sidebar for conversation steps and a right panel for configuring the current step.

**Left Panel (Conversation Steps):**

- Customer starts with:** A dropdown menu showing "Dress".
- Conversation steps:** A list of steps with their respective triggers and actions.
  - Step 1: Trigger "Are You Looking Dress for ???". Action: "Continue to next step".
  - Step 2: Trigger "1 == Female". Action: "Welcome Mam You look gorgeous today !! What are you looking for ??".
  - Step 3: Trigger "1 == Male". Action: "Welcome Sir, you Look Smart Today. what type of dress you need??".
  - Step 4: Trigger "2 == Saree". Action: "This step has media content".
  - Step 5: Trigger "2 == Churidar". Action: "This step has media content".
  - Step 6: Trigger "3 == Shirts". Action: "This step has media content".

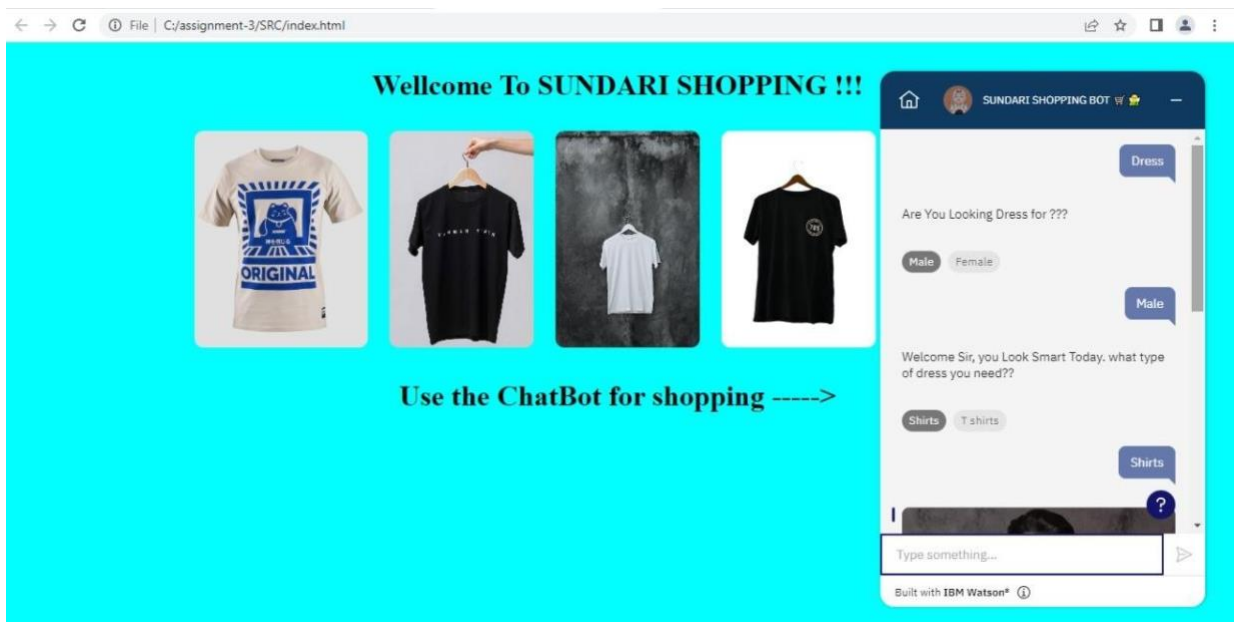

**Right Panel (Step Configuration):**

- Customer starts with:** A text area for entering phrases that start the conversation.
- Enter phrases your customer might use to start this action:** A text area for entering phrases that trigger the current step.
- Step 5 is taken with conditions:** A dropdown menu showing "with conditions".
- Conditions:** A section for defining conditions for the step.
  - Condition 1: "If All of this is true:"
    - 2. Welcome M... is Churidar
- Assistant says:** A text area for the assistant's response. The current response is: "This saree is beautiful for you Mam !! If you like to buy?"

The interface includes a "Preview" button and a "New step" button at the bottom right.
